Educational Topic

Advocacy is all about communicating what you need to reach your health goals and live your best life. In this program, we'll share some strategies for successful advocacy, including tapping into your inner strengths and identifying a support system. You'll leave the session with an advocacy map to guide you, helping you find your voice and use it to support yourself and others in the hemophilia community.

*This event is free to our community members
due to the generosity of our sponsor.*
