BDASC Mission: Our mission is to raise awareness for and advocate on behalf of persons with bleeding disorders and their families; provide education and supportive services; and promote ongoing research to improve the quality of life for those affected.

BDASC Vision: Our vision is to be recognized as a leading organization providing valued services; as ambassadors of public outreach to enlighten and foster an understanding of what matters most to those affected by hemophilia and bleeding disorders; and to be our community's first choice in partnership to achieve their highest potential through empowerment, connection to their community and being part of the solutions that affect them the most, until a cure is achieved.

Par Fore The Clot Charity Golf Fundraiser

We Did It! Together, We Made an Incredible Impact!

What an incredible day! What an incredible community! And what an extraordinary impact we made together!

On September 25, 2026, at The Preserve at Verdae Golf Course in Greenville, South Carolina, more than **175 golfers, volunteers, sponsors, and supporters** came together for BDASC's 12th Annual Par Fore The Clot Charity Golf Fundraiser.

It was a day filled with friendship, generosity, excitement, and a shared commitment to making a difference in the lives of individuals and families affected by bleeding disorders. **And together, we raised an incredible $77,936!** Thanks to the generosity, dedication, and tremendous hearts of our supporters, these funds will help advance the mission and services of the Bleeding Disorders Association of South Carolina.

Our impact also reaches beyond South Carolina. A small portion of the proceeds was donated to the **National Bleeding Disorders Foundation's (NBDF) Judith Graham Pool Postdoctoral Research Fellowship Program**, supporting important research that brings hope for improved treatments and, ultimately, cures for bleeding disorders. **But $77,936 represents so much more than dollars raised.**

It represents children attending Camp CoAg, where they build confidence, independence, and lifelong friendships. It represents educational opportunities, college scholarships, advocacy efforts, and financial assistance for families facing difficult times. It represents community connections, support programs, and the reassurance that no family living with a bleeding disorder has to face their journey alone. Most importantly, it represents **hope, opportunity, and a stronger future for our bleeding disorders community.**

Every sponsor. Every golfer. Every donor. Every volunteer. Every committee member. Every community partner made this possible, and there are simply not enough words to express our gratitude!

Kicking Off the Celebration at Topgolf!

Thursday, September 24, 2026

The excitement began the evening before our tournament with a special Par Fore The Clot Kickoff Celebration at Topgolf, generously sponsored by **CSL Behring, one of our Diamond Sponsors.** This family-friendly gathering brought together our bleeding disorders community, families, dedicated Tee-Off Committee, volunteers, sponsors, golfers, industry partners, and friends for an evening of fellowship, inspiration, laughter, and fun. It was a wonderful opportunity to recognize the hard work, generosity, and commitment of everyone who helps bring Par Fore The Clot to life year after year. More importantly, it reminded us that this fundraiser is about much more than golf. It is about bringing people together who believe in our mission and want to make a meaningful difference.

One of the evening's highlights was hearing from **Pete Dawson, an athlete involved with CSL Behring's Gettin' in the Game program.** Pete shared his personal journey of perseverance, strength, and living with a bleeding disorder. His inspiring story reminded everyone in attendance why our work matters and how access to education, treatment, support, and opportunities can change lives. **It was the perfect way to begin a weekend dedicated to giving back, building connections, and celebrating our incredible community!**

An Early Morning Filled with Excitement – Friends of the Par Arrive!

Before the sun even rose over The Preserve at Verdae, our incredible volunteers and Tee-Off Committee were already hard at work preparing for the big day! From setting up registration and welcoming our breakfast guests to preparing the golf holes, organizing activities, and putting the finishing touches on the course, the excitement was building with every passing minute.

As the sun began to rise, so did the energy! Golfers, sponsors, and longtime friends arrived, greeting one another with smiles, handshakes, and laughter. One of the most special parts of Par Fore The Clot is seeing familiar faces return year after year, alongside new friends joining our mission for the very first time.

Following our morning welcome, announcements, and heartfelt expressions of gratitude, it was time for the highly anticipated shotgun start! **What an incredible sight to see 144 golfers in 72 golf carts heading out across the course, ready for a day of friendly competition, generosity, and fun!**

Throughout the tournament, our volunteers and sponsors welcomed golfers at each hole with exciting activities, friendly challenges, and opportunities to support the mission. From a lively poker game and a unique AR-15 golf ball launcher experience to Spin to Win, chances to land a ball on the green, and the always-popular Long Drive Professional Hole featuring our good friend **Kyle Blakely with Charity Golf**, there was no shortage of excitement! Along with the traditional tournament competitions, golfers generously participated in fundraising activities throughout the course, helping us reach our remarkable fundraising total. The laughter, camaraderie, and spirit of giving were everywhere. Every hole brought another opportunity to connect, have fun, and make an impact.

Celebrating Our Champions and the Power of Community!

Following an exciting day on the course, participants gathered at the Embassy Suites for our tournament awards celebration. It was a wonderful opportunity to recognize our tournament winners, celebrate the day's accomplishments, thank our generous sponsors, and reflect on what we achieved together. While we proudly congratulated our winning teams and tournament Champions, the greatest victory of the day belonged to the bleeding disorders community of South Carolina.

Because of the commitment of so many, BDASC can continue providing meaningful programs, essential services, education, advocacy, and assistancce to individuals and families who depend on our organization. We extend our deepest appreciation to our sponsors, business partners, golfers, donors, volunteers, and especially our dedicated Tee-Off Committee, whose countless hours of planning and hard work helped make this event such an extraordinary success. You are the heart of Par Fore The Clot, and we could not do this without you!

More Than a Golf Tournament – A Mission in Motion!

Par Fore The Clot is more than an annual fundraising event. It is a celebration of what happens when a community comes together with compassion, generosity, and a shared purpose. Every swing made a difference. **Every gift created an opportunity. Every volunteer made an impact. And every participant helped move our mission forward.**

To everyone who helped make our 12th Annual Par Fore The Clot Charity Golf Fundraiser a tremendous success, **THANK YOU!** Together, we are creating stronger connections, greater opportunities, and brighter futures for individuals and families living with bleeding disorders.

$77,936 raised. One incredible community. Countless lives impacted. We can't wait to see you on the course next year! Thank you.

A Message from Our Executive Director

From the Desk of Sue Martin, Executive Director

A Year of Impact, Gratitude, and Community — Together, We Made a Difference!

As we begin to close the chapter on 2026, I find myself reflecting on another remarkable year of service, connection, advocacy, and meaningful accomplishments for the Bleeding Disorders Association of South Carolina. Most importantly, I am filled with tremendous gratitude for the incredible people who make our mission possible.

What a year it has been! And what an extraordinary community we have!

Every year brings new opportunities, challenges, successes, and lessons. But one thing remains constant: the strength, resilience, compassion, and determination of our bleeding disorders community. Together, we continue to prove that when people come together with a shared purpose, incredible things can happen.

A Year of Growing, Connecting, and Making an Impact

Throughout 2026, BDASC continued to strengthen its commitment to serving individuals and families affected by inherited bleeding disorders across South Carolina. From our statewide educational conferences and regional support gatherings to our advocacy initiatives, family programs, financial assistance, and awareness campaigns, our mission remained at the heart of everything we accomplished. We celebrated another successful year of our HELLO Conference, Adult Connections Retreat, Fall Advocacy & Medical Symposium (FAMS), and numerous community gatherings that brought families together to learn, share experiences, build friendships, and find strength in knowing they are ***never alone.***

One of our proudest accomplishments was partnering with Prima Health, Camp Kemo Programs to build **Camp CoAg Summer Camp**, where teens and children living with bleeding disorders and their siblings came together for an unforgettable camp experience. Watching them gain confidence, develop independence, learn new skills, and simply enjoy being kids reminds us why programs like this matter so deeply.

We also continued to support families facing the financial and emotional challenges of living with a lifelong bleeding disorder. Through our assistance programs, scholarships, outreach, and educational opportunities, we worked to ensure that families have access to resources, connections, and support when they need them most. **Every program, every connection, and every helping hand represents a moment of impact.**

Raising Our Voices — Advocacy That Matters

Advocacy remained one of our strongest commitments in 2026. Our Legislative Welcome Breakfast and State Advocacy Days brought together passionate advocates, families, and community leaders who courageously shared their personal stories with South Carolina lawmakers. Together, we continued our fight for fair and affordable access to healthcare, particularly our efforts to ban harmful copay accumulator and maximizer policies in our state regulated healthcare plans that prevent patient assistance from counting toward out-of-pocket healthcare costs.

With overwhelming support in the South Carolina House of Representatives and growing bipartisan support in the Senate, we made significant progress. Although our legislation did not cross the finish line this session, **our voices were heard, our relationships grew stronger, and our determination has never been greater.** Our advocacy efforts also extended nationally as we continued to support initiatives addressing the unique needs of women and girls living with bleeding disorders, access to diagnosis and treatment, and the protection of patient rights.

I am especially grateful to our Advocacy Coalition, Advocacy Ambassadors, legislative partners, and every member who shared their story and to all who listened. Your courage is helping shape a better future for our entire community. Our work is not finished, and we will continue moving forward in 2027 with renewed energy and determination.

The Power of Giving Back

This year also reminded us of the incredible generosity that surrounds our organization. Our STEP Walk for Bleeding Disorders and our 12th Annual Par Fore the Clot Charity Golf Tournament brought together sponsors, volunteers, families, and friends in support of our mission. We were especially proud to celebrate an outstanding **$77,936 raised through Par Fore the Clot!** These funds represent so much more than a successful fundraiser. They represent educational opportunities, summer camp experiences, financial assistance, advocacy, scholarships, research support, and hope for the families we serve. To our corporate partners, industry sponsors, grant supporters, individual donors, and community businesses: **thank you for believing in our mission and investing in the lives of those affected by bleeding disorders.** Your generosity makes our work possible, and your continued partnership allows us to reach further, serve more families, and build a stronger organization.

Board's Blog - Executive Director Welcome

To Our Volunteers — You Are the Heart of BDASC!

There are simply not enough words to express my appreciation for our extraordinary volunteers. Whether you served on a committee, helped organize an event, welcomed families at registration, supported a fundraiser, advocated at the State House, assisted at camp, or quietly stepped forward whenever there was a need, **YOU made a difference!** Our volunteers give something that cannot be measured in dollars: their time, their talents, their compassion, and their hearts. I have witnessed countless moments this year when someone stepped up without being asked, offered a helping hand, encouraged another family, or went above and beyond to ensure an event or program was successful. Those are the moments that define our organization. To our Board of Directors, committee members, advocacy leaders, medical partners, and dedicated volunteers, thank you for your leadership, commitment, and willingness to serve. Your support, guidance, and belief in our mission mean more than you may ever know.

To Our Members and Families — You Are Our Why

To the individuals and families we have the privilege of serving, I want you to know how deeply grateful I am for each of you. You are the reason BDASC exists. Your stories, experiences, challenges, successes, and voices continue to shape our programs and guide our work. Thank you for trusting us, participating in our programs, supporting one another, sharing your experiences, and helping us create a community where everyone belongs. Whether you have been part of BDASC for decades or joined us for the very first time this year, you are an important part of our family. We have celebrated milestones, shared laughter, welcomed new families, supported one another through difficult times, and remembered those we have lost along the way. These experiences remind us that BDASC is more than an organization. **We are a community connected by compassion, understanding, friendship, and a commitment to improving lives.**

Looking Ahead to 2027 — Our Mission Continues

As we prepare for another year, I am excited about the opportunities ahead. We will continue strengthening our educational programs, expanding regional outreach, growing Camp CoAg, supporting families, building community partnerships, and advocating for meaningful healthcare policies that protect those we serve. We will also continue investing in the future of BDASC by strengthening our organizational operations, volunteer leadership, and long-term sustainability. Our commitment remains clear: **to put our community first, ensure every voice matters, advocate courageously, and lead with heart.** There is still much work to be done, but I know we have the people, passion, and determination to continue making a lasting difference.

From My Heart — Thank You!

After so many years of serving this community, I continue to be inspired by the people who make up our BDASC family. I have seen and experienced firsthand the challenges that living with a bleeding disorder diagnosis can bring, but I have also witnessed extraordinary strength, resilience, generosity, and hope. I am reminded every day that no accomplishment belongs to one person. Every success we celebrate is the result of people working together, believing in one another, and sharing a commitment to something greater than themselves.

To our members, families, volunteers, Board of Directors, healthcare professionals, advocacy partners, sponsors, donors, and friends — THANK YOU!

Thank you for your trust. Thank you for your kindness. Thank you for showing up. Thank you for believing in what we do. And thank you for helping us make 2026 another meaningful year of impact. I am personally and deeply grateful for the friendships, partnerships, and support that have carried us through this year. It is truly an ***honor and privilege*** to serve as your Executive Director. May we enter 2027 with grateful hearts, renewed hope, and the knowledge that together, we are making a difference — one family, one voice, and one moment of impact at a time. **Because together, we are stronger. Together, we are making an impact. And together, we are BDASC!**

With heartfelt gratitude and warmest wishes to my wonderful staff and each and every one of you, I wish you and your loved ones a joyous holiday season and a bright New Year filled with hope, happiness, good health, and countless blessings.

Sue

BDASC Welcomes Travis Shaw to Our Team!

The **Bleeding Disorders Association of South Carolina (BDASC)** is excited to welcome **Travis Shaw** to our team as our new part-time, contract **Operations and Administrative Coordinator!** In this role, Travis will support the many day-to-day operations of BDASC, including communications, programs and events, fundraising, data management, grants, and advocacy. His contributions will help strengthen our organizational operations and expand our ability to serve individuals and families affected by bleeding disorders throughout South Carolina.

Travis brings more than **15 years of experience** as a nonprofit leader, advocate, and storyteller, with a background in behavioral health, social services, nonprofit management, and client-focused organizations. He believes meaningful change begins with listening to the people we serve. Throughout his career, Travis has been recognized for his ability to turncomplex requirements and processes into clear, effective, and accountable systems while building trust and strong relationships with employees, clients, community partners, and public officials. His professional experience includes a focus on healthcare access, community outreach, nonprofit operations, and helping individuals and families navigate systems that too often leave their voices unheard. He has worked with organizations including **Aid Upstate, Greenville Connects, and Carolina Family Services**, and is the founder of **Say Here**, an initiative exploring the barriers children and families face in getting to school.

Travis holds a B**achelor of Science in Psychology** and is currently pursuing his **Master's degree in Nonprofit Administration**. As he joins BDASC, Travis brings a people-first approach, a passion for community service, and a commitment to strengthening the connections and resources that make a meaningful difference in people's lives. We look forward to the experience, fresh perspectives, and talents he will bring to our organization as we continue advancing our mission of education, advocacy, awareness, and support. **Travis is excited to get started, meet our members and families, and become part of the BDASC community!**

Please join us in giving Travis a warm BDASC welcome!

VOLUNTEERS ARE THE HEART OF BDASC!

Behind Every Strong Community Is a Team of Dedicated Volunteers–And We Need YOU!

At the Bleeding Disorders Association of South Carolina (BDASC), we believe that **when people come together with a shared purpose, incredible things happen!** Our volunteers are living proof of that. From the bottom of our hearts, we are grateful for the amazing individuals who generously give their time, talents, energy, and compassion to support our mission. Whether you volunteer once a year or return to help at every event, **YOU make a difference!**

As a small nonprofit with a big mission, BDASC depends on the dedication of volunteers to help us reach and serve individuals and families affected by bleeding disorders throughout South Carolina. From the first stages of planning to the final moments of an event, our volunteers help bring our programs, fundraisers, educational opportunities, and community gatherings to life.

Simply put, we couldn't do what we do without YOU!

Looking for a Meaningful Way to Give Back? Join Our Volunteer Family!

Are you looking for an opportunity to make a difference, meet wonderful people, build friendships, and have some fun along the way? **We would LOVE to have you join our volunteer team!**

You don't have to be personally affected by a bleeding disorder to make a meaningful impact. Whether you're a community member, student, family member, friend, corporate partner, or someone who simply wants to give back, there's a place for YOU at BDASC!

There are so many ways to get involved:

- Help at fundraising events, walks, golf tournaments, and community gatherings.
- Assist with event registration, setup, activities, and welcoming families.
- Prepare educational materials, welcome packets, and event supplies.
- Share your talents in photography, communications, planning, or other special projects.
- Serve on a committee or explore leadership opportunities.
- Simply lend a helping hand wherever one is needed!

scan for more info

No special experience is required—just a caring heart, a willingness to help, and a little of your time. Whether you have a few hours to give or want to become a regular volunteer, every act of kindness matters. Every helping hand strengthens our mission, supports our families, and reminds our community that they are never alone.

READY TO MAKE A DIFFERENCE? LET'S GET CONNECTED!

We invite you to become part of something special. Volunteering with BDASC is more than helping at an event—it's about creating connections, sharing hope, building friendships, and making lasting memories while changing lives. **Interested in joining us? We'd love to hear from you!** Contact Executive Director Sue Martin at **sue.martin@bda-sc.org**, call the BDASC Chapter office, or visit our volunteer registration page to get started. **Give a Little Time. Share a Lot of Heart. Make a Lasting Impact!**

A Special Thank You to Our 2026 Volunteers!

To our incredible 2026 volunteers, THANK YOU! To our dedicated Board of Directors, committee members, event volunteers, community partners, and everyone who stepped forward to lend a helping hand—your generosity, teamwork, and commitment mean more than words can express. You helped make our events possible, supported our small but mighty staff, strengthened our programs, and brought smiles, encouragement, and hope to families across South Carolina. Some of you have been by our side for years, while others joined us for the very first time. Each of you has left a meaningful mark on our organization and the community we serve. You are not just volunteers. You are part of the BDASC family, and you are the heart behind our mission!

With heartfelt appreciation, thank you for showing up, giving back, and helping us make a difference—one family, one event, and one act of kindness at a time. **Together, we are building a stronger, more connected bleeding disorders community!**

BDASC Board of Directors Adopts New Organizational Core Values

Our Values. Our Commitment. Our Community.

The Bleeding Disorders Association of South Carolina (BDASC) is proud to announce that our Board of Directors has officially adopted a new set of organizational Core Values to guide our mission, leadership, and commitment to the bleeding disorders community. These values reflect who we are, what we believe, and how we promise to serve the individuals and families who place their trust in us. They establish a shared foundation for our Board of Directors, staff, volunteers, and organizational leaders, strengthening our commitment to accountability, compassion, collaboration, and integrity.

Our Six Core Values Are:

- **Community First** – Putting the needs of those we serve at the heart of everything we do.
- **Integrity & Trust** – Leading with honesty, transparency, and accountability.
- **One Team** – Working together with respect and a shared purpose.
- **Every Voice Matters** – Ensuring everyone feels heard, valued, and included.
- **Advocate Courageously** – Standing up for the needs, rights, and well-being of our community.
- **Lead with Heart** – Serving with compassion, kindness, and dedication.

These values are more than words on a page. **They are commitments we make to one another and to the community we serve.** They will help guide our decisions, strengthen our organizational culture, and shape how we work together to advance our mission. As BDASC continues to grow and evolve, our commitment remains the same: to serve with purpose, lead with integrity, advocate with courage, and always put our community first.

Our Values. Our Commitment. Our Community. Together, we are BDASC!

2026 FAMS: A WEEKEND OF LEARNING, CONNECTION, AND ADVOCACY!

Together We Learn. Together We Advocate. Together We Make a Difference!

What an incredible weekend of education, empowerment, friendship, and community at the Bleeding Disorders Association of South Carolina's (BDASC) **2026 Fall Advocacy & Medical Symposium (FAMS)!** Held October 9–11 in beautiful Myrtle Beach, South Carolina, FAMS brought together individuals and families affected by bleeding disorders from across the state for a meaningful weekend focused on education, advocacy, health and wellness, and building stronger community connections.

FAMS is more than an educational conference—it's an opportunity for our community to come together, share experiences, learn from experts, strengthen friendships, and discover the power of our collective voices.

Throughout the weekend, attendees participated in educational sessions and discussions designed to help individuals and families better understand their bleeding disorders, explore important medical and treatment options, and become more confident advocates for themselves and others.

We were especially grateful to welcome our dedicated medical professionals, treatment experts, and guest speakers, including Dr. Bobby Duc Tran, who shared valuable medical knowledge, treatment updates, and insights to help individuals and families better understand and manage their bleeding disorders. Our advocacy sessions, featuring knowledgeable panelists and passionate community advocates, provided important updates, meaningful discussions, and opportunities to prepare for the upcoming 2027 legislative session. Together, these conversations reinforced the importance of sharing our personal stories, raising our collective voices, and working together to create meaningful change for the bleeding disorders community.

Empowering Our Next Generation: Youth & Teen Programming

While parents and adults participated in educational sessions, our children and teens had opportunities to engage in their own activities, build friendships, and connect with others who understand what it means to grow up with a bleeding disorder.

One of the special highlights of FAMS was our dedicated **teen programming**, provided by Beyond Recreation, designed to provide age-appropriate education, meaningful connections, and plenty of fun for our teen community members! Our teen programming focused on encouraging independence, building confidence, strengthening self-advocacy skills, and helping young people recognize the importance of taking an active role in their health and well-being. Through interactive activities, group discussions, and opportunities to connect with their peers, our teens were encouraged to find their voices, share their experiences, and support one another.

At BDASC, we believe our teens are not just the future of our community—they are an important part of our community TODAY!

Providing a welcoming and supportive environment where young people can learn, laugh, develop leadership skills, and create lasting friendships is an important part of our mission. These experiences help build the foundation for a lifetime of confidence, connection, and advocacy. We are proud of our young participants and excited to watch them continue to grow into the next generation of community leaders and advocates!

Building Friendships and Making Memories

Beyond the educational sessions, FAMS offered something equally important—time to simply be together! Families enjoyed opportunities to reconnect with old friends, welcome new members, share personal experiences, and strengthen the bonds that make our bleeding disorders community so special. A memorable evening at **Pirates Voyage** brought families together for entertainment, laughter, and fun, creating special memories for children, teens, and adults alike.

For many families, gatherings like FAMS provide a sense of belonging that cannot be found anywhere else—a place where everyone understands, friendships grow, and no one has to face the challenges of living with a bleeding disorder alone.

Thank You for Making FAMS FAM-TASTIC!

We extend our heartfelt appreciation to our speakers, medical professionals, sponsors, exhibitors, volunteers, Board members, youth and teen program leaders, and everyone who helped make this year's symposium possible. A special thank-you to **Sanofi** for sponsoring our Friday evening dinner education.

And most importantly, **THANK YOU to every individual and family who attended!** Your participation, questions, conversations, and willingness to share your experiences are what make FAMS so meaningful. ***Thank you to our event staff, our executive director Sue, and our volunteers who make FAMS run so smoothly.*** As we look ahead to 2027, we are excited to build upon the knowledge, relationships, friendships, and advocacy momentum created during this special weekend. **A special thank you also to all our sponsors for making FAMS possible.**

Because at BDASC, we believe that education empowers, advocacy creates change, friendships build community, and together we are stronger. That's a wrap on FAMS 2026—and what a FAM-TASTIC weekend it was!

RAISING AWARENESS WHERE IT MATTERS: BDASC CONNECTS WITH SOUTH CAROLINA SCHOOL NURSES!

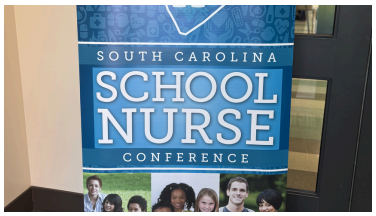

Educating School Nurses. Supporting Students. Recognizing the Signs of Bleeding Disorders.

The Bleeding Disorders Association of South Carolina (BDASC) was proud to participate as an exhibitor at the South Carolina State School Nurses Conference in Charleston on November 6th, sharing important educational resources and raising awareness about inherited bleeding disorders and the unique needs of children and teens living with these conditions.
School nurses play a vital role in keeping students healthy, safe, and supported throughout their school years. For children living with bleeding disorders, having a knowledgeable and informed school nurse can make a tremendous difference in their daily lives, safety, confidence, and ability to participate fully in school activities.

Throughout the conference, BDASC connected with school nurses from across South Carolina, providing educational materials and information about hemophilia, von Willebrand disease (VWD), and other rare bleeding disorders. Our outreach focused on helping nurses better understand how to support students with diagnosed bleeding disorders, recognize potential bleeding emergencies, and work collaboratively with families and healthcare providers to ensure appropriate care and accommodations at provided at school.

Recognizing the Signs: Girls Bleed Too!

An especially important part of our outreach was raising awareness about **girls and young women who may be living with an undiagnosed bleeding disorder.** Heavy menstrual bleeding is often dismissed as a normal part of growing up, but for some girls, it can be an important warning sign of an underlying bleeding disorder, such as von Willebrand disease. School nurses are often among the first trusted healthcare professionals students turn to when experiencing menstrual concerns, frequent nosebleeds, unusual bruising, fatigue, or other symptoms. By educating school nurses about these potential warning signs, we hope to encourage earlier recognition, meaningful conversations with students and families, and appropriate referrals for medical evaluation and testing. **No young girl should have to miss school, struggle through heavy periods, or suffer in silence because the signs of a possible bleeding disorder go unrecognized.**

Building Awareness, One School at a Time

Our participation in this statewide conference was another important opportunity to expand BDASC's educational outreach beyond our immediate bleeding disorders community and into the schools where children spend so much of their time. By equipping school nurses with knowledge, resources, and connections to BDASC, we are helping build a stronger network of support for students and families throughout South Carolina.
We extend our sincere appreciation to the school nurses who stopped by our exhibit, asked questions, shared experiences, and demonstrated their commitment to improving student health and well-being. **Together, we can help identify bleeding disorders earlier, support children more effectively, and ensure that every student—especially girls whose symptoms may be overlooked—has the opportunity to be heard, understood, and receive the care they deserve. Because awareness leads to recognition, recognition leads to diagnosis, and diagnosis opens the door to better care and healthier futures!**

Mild Bleeding Disorders Matter Too! Doing What Moves YOU!

BDASC Wrapped Up Its 2026 Support Group Series with Education, Connection, and Family Fun!

The Bleeding Disorders Association of South Carolina (BDASC) wrapped up its fourth and final gathering of our **2026 Support Group Series** on November 14 in Greenville, South Carolina, with an afternoon filled with education, friendship, movement, and plenty of fun! Generously sponsored by **Takeda**, this special gathering, **"Do What Moves You! Mild Bleeding Disorders Matter Too!"**, brought individuals and families together to learn about the importance of understanding mild bleeding disorders, staying active, and finding enjoyable ways to support their health and well-being.

Throughout the year, our four support group gatherings provided meaningful opportunities for members of the bleeding disorders community to connect, share experiences, strengthen friendships, and learn from one another.

Mild Doesn't Mean It Doesn't Matter!

Our educational presentation focused on an important message: **Just because a bleeding disorder is classified as mild doesn't mean its impact on daily life is insignificant.** Participants learned about the importance of recognizing bleeding symptoms, understanding their individual health needs, and making informed choices about physical activity and healthy living. Our message was simple: **Mild bleeding disorders matter, movement matters, and YOU matter!**

Learning, Lunch, Laughter, and a Little Friendly Competition!

Our day began at **Stella's Southern Brasserie in Greenville**, where attendees enjoyed a delicious lunch buffet, an informative educational presentation, and meaningful conversations with friends and fellow community members. Following lunch, the fun continued at **The Pickle Yard**, where families had the opportunity to try pickleball and cheer one another on! Whether participants picked up a paddle for the first time, enjoyed a little friendly competition, or simply spent time visiting and watching the activities, there was something for everyone.

The afternoon was a wonderful reminder that staying active doesn't have to mean participating in strenuous exercise. It's about finding movement and activities that are enjoyable, appropriate for individual abilities, and supportive of overall health and wellness. Most importantly, the day provided an opportunity to laugh, make memories, build confidence, and enjoy being together as a community.

Celebrating a Year of Community Connections!

As we concluded our four-part 2026 Support Group Series, we celebrated more than just another successful event. We celebrated the friendships formed, the knowledge shared, and the connections strengthened throughout the year. These gatherings reminded us of the importance of bringing families together in welcoming environments where they can learn, share their journeys, and feel supported by others who understand the unique challenges of living with a bleeding disorder.

A very special thank-you to Takeda for generously sponsoring our 2026 Support Group Series! Their support helped make these valuable educational and social opportunities available to our families at no cost throughout the year. We also extend our heartfelt appreciation to every individual and family who participated in our gatherings. Your enthusiasm, willingness to learn, and commitment to staying connected are what make these programs so meaningful.

As we look ahead to 2027, we are excited to continue creating opportunities that encourage education, wellness, friendship, and a stronger, more connected bleeding disorders community. **Because at BDASC, every bleeding disorder matters, every connection counts, and everyone deserves the opportunity to live an active, healthy, and fulfilling life!**

Apply to Represent BDASC at the 2027 JNC

GETTIN' IN THE GAME℠ JUNIOR NATIONAL CHAMPIONSHIP Presented by CSL BEHRING

Developed by CSL Behring, the Gettin' in the Game (GIG) Junior National Championship (JNC) was the first national golf, basketball, swimming, and baseball competition designed specifically for the bleeding disorders community. The program gives children with bleeding disorders an opportunity to compete in golf, basketball, baseball, and swimming and provides education and information-sharing opportunities for participants and their parents/caregivers.

BDASC and Chapters throughout the nation partner each year to provide this opportunity to our members. Applications are now available on our website and must be sent to the Chapter by the deadline date to be considered. BDASC will pick (3) applicants to attend and they will be notified shortly after the deadline date by BDASC.

This is a great opportunity for kids and teens to grow and connect nationally with other families within this community.

Good Luck to all!
https://bda-sc.org/events/recreational-programs/gettin-in-the-game-junior-national-championships-jnc/

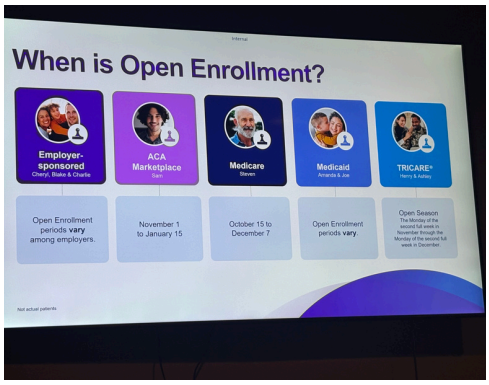

Making Health Insurance Work for YOU!

The Bleeding Disorders Association of South Carolina brought members of our bleeding disorders community together on November 18th for an informative and enjoyable evening of education, conversation, and connection at **Braza Do Sul Brazilian Steakhouse in Columbia, South Carolina.**

Generously sponsored by **Sanofi**, our educational dinner program, **"Making Health Insurance Work for You!"**, provided individuals and families with an opportunity to learn more about navigating health insurance, understanding healthcare coverage options, and making informed decisions about their healthcare needs. For individuals living with bleeding disorders, understanding health insurance is especially important. Access to specialized medical care, lifesaving treatments, and affordable coverage can significantly impact the health, financial security, and overall well-being of individuals and families.

Throughout the evening, participants explored important considerations when evaluating healthcare plans, understanding benefits, managing out-of-pocket expenses, and identifying resources that may help them navigate the often-confusing world of health insurance. **Our goal was simple: to help families feel more informed, confident, and empowered when making healthcare decisions for themselves and their loved ones.**

Education, Conversations, and Community!

In addition to the educational presentation, attendees enjoyed a delicious Brazilian steakhouse dinner and the opportunity to connect with others who share similar healthcare experiences and challenges. The evening encouraged meaningful conversations, questions, and the sharing of personal experiences. These connections are an important part of BDASC's mission, reminding our families that they are not alone in navigating the complexities of living with a bleeding disorder. As we approached a new year and the challenges of selecting and reviewing healthcare coverage, this gathering provided timely information to help families better prepare for their healthcare needs in 2027.

We extend our sincere appreciation to **Sanofi for generously sponsoring this educational program** and helping make this valuable opportunity available to our bleeding disorders community at no cost. We also thank every individual and family who joined us for the evening. Your participation, questions, and willingness to learn and share experiences helped make this gathering meaningful. At BDASC, we believe that **knowledge is empowering, education opens doors, and informed patients and families are better equipped to advocate for their healthcare needs**. We look forward to continuing to provide educational opportunities that help our community navigate healthcare challenges, access the care they need, and live healthier, more confident lives. **Because understanding your health insurance isn't just about knowing your benefits—it's about protecting your health, your treatment, and your future!**

Celebrate the Season with Gratitude!

The Art of Gratitude- A Holiday Gathering of Gratitude | Thursday, December 10, 2026 | 6:00-8:00 PM

Join BDASC for a Special Evening of Gratitude, Family Fun, and Community Connection!

As the year comes to a close, we have so much to be thankful for—especially the strength, friendship, and support of our incredible bleeding disorders community! The Bleeding Disorders Association of South Carolina (BDASC) invites you and your family to join us for a FREE, festive holiday gathering as we celebrate the season, reflect on our blessings, and enjoy a wonderful evening together.

Educational Presentation: The Art of Gratitude

Did you know that practicing gratitude may have a positive impact on your health and overall well-being? Living with a chronic health condition can bring unique challenges, but finding moments of gratitude can help us focus on the positive, build resilience, and appreciate the meaningful connections in our lives. During our Gratitude Nation educational presentation, we'll explore the benefits of practicing gratitude and discover simple, meaningful ways to incorporate it into our everyday lives.

An Evening for the Whole Family!

Come enjoy a delicious **dinner buffet, fun family-friendly activities, meaningful Conversations, and opportunities to connect** with friends, both old and new! This special gathering is open to individuals and families affected by bleeding disorders of all ages. Whether you're a longtime BDASC member or joining us for the first time, we look forward to welcoming you! **Let's Celebrate What Matters Most! Together, we have so much to be grateful for!**

Holly Tree Country Club
500 Golf Club Drive
Simpsonville, SC 29681

FREE for BDASC Members and Families! Registration Deadline: December 3, 2026

The holiday season is about more than celebrations—it's about the people who make our lives meaningful, the connections that bring us strength, and the gratitude we share. *This educational community gathering is generously sponsored by Lux Infusions and Sanofi.*

LUX INFUSION

Get Ready for a WILD Time at Winterfest 2026!

Winterfest Goes WILD! A Celebration of Family, Community & Connection!

Saturday, December 12, 2026 | Riverbanks Zoo & Garden Ndoki Lodge, | Columbia, SC

The Bleeding Disorders Association of South Carolina is excited to invite our bleeding disorders community to our last gatherings of the year—**Winterfest 2026: Winterfest Goes WILD!** Get ready for a ROARING good time as we bring families from across South Carolina together for a special day of education, celebration, friendship, and WILD adventures at Riverbanks Zoo & Garden in Columbia! Winterfest is more than just a holiday gathering. It's an opportunity to celebrate the strength and resilience of our bleeding disorders community, reconnect with old friends, welcome new families, and reflect on another incredible year of learning, advocacy, and supporting one another.

A WILD Day of Family Fun!

This year's Winterfest promises something special for everyone! Families will enjoy a day filled with meaningful connections, educational opportunities, community updates, a delicious lunch and presentation, and plenty of activities, fun and excitement. Following our Winterfest program, families can explore Riverbanks Zoo and enjoy the amazing wildlife and attractions that make this destination so special! Whether you're joining us for the first time or have been part of the BDASC family for years, we can't wait to celebrate with you!

Celebrating Our Community and Looking Ahead!

As we close out 2026, Winterfest gives us an opportunity to recognize the many moments of impact we've shared throughout the year—from educational programs and advocacy efforts to summer camp, family support, and community outreach. We'll also look ahead to the exciting opportunities coming in 2027 and share ways families can continue to learn, connect, and get involved with BDASC. **Because at BDASC, no family should have to navigate life with a bleeding disorder alone. Together, we are stronger! We can't wait to see you at Winterfest 2026—where our BDASC family goes WILD together!**

New and emerging treatments for von Willebrand disease (VWD)

Ashley Fletcher

Von Willebrand disease (VWD) is a lifelong bleeding disorder caused by problems with a blood protein called von Willebrand factor (VWF), which helps blood clot properly. Current treatments are effective for many people, but researchers around the world are working on new therapies that may offer more options in the future, especially for people with more severe or complex forms of VWD.

In recent articles I have concentrated on novel and emerging therapies in haemophilia, with less on VWD. But at the Blood 2025 conference there was a good session on VWD and particularly the presentation by Prof Frank Leebeek from Erasmus University Medical Centre in the Netherlands on *Treatment options for von Willebrand disease in the near future.*

Below is an overview of novel and emerging treatments currently being studied. Most of these are experimental and not yet approved for routine use, but they show promising directions for future care.

NB: 'Current stage' relates to the completed clinical trials presented at the Blood 2025 Conference.

TREATMENTS AIMED AT IMPROVING CLOTTING FUNCTION

Efanesoctocog alfa (BIVV-001)

How it's given: Intravenous(into a vein).

How it works: Increaseslevelsof clotting factor VIII(8), which works closely with VWF.

Current stage: Earlyclinicaltrials (Phase 1) in people with VWD type 2N and type 3[1].

What this means for patients: This treatment may help people with very low factor VIII levels, but results are still awaited.

Emicizumab[2]

How it's given: Subcutaneous injection (under the skin).

How it works: Acts like factor VIII using a laboratory-made antibody.

Current stage: Approved for haemophilia A, but not approved for VWD.

What this means for patients: Some doctors have used it 'off label' (prescribed but not yet officially approved for that condition) in selected VWD cases, but it is not yet a standard VWD treatment.

National Haemophilia 233, March 2026

TREATMENTS THAT TARGET VON WILLEBRAND FACTOR DIRECTLY

VGA039[3]

How it's given: Subcutaneous injection.

How it works: A monoclonal antibody that affects a natural blood protein (protein S) to improve clotting.

Current stage: Phase 1 studies in healthy volunteers and people with VWD.

What this means for patients: Phase 1-very early research but shows potential as a new way to reduce bleeding.

Rondaptivo pegol (BT200)[4]

How it's given: Subcutaneous injection.

How it works: Binds to part of the VWF protein to improve how it works.

Current stage: Clinical studies in people with VWD types 2A and 2B

What this means for patients: One of the more advanced experimental treatments specifically designed for certain VWD subtypes.

Nanobody KB-V13A12[5]

How it's given: Subcutaneous injection.

How it works: Links VWF to another blood protein (albumin) to keep it working longer.

Current stage: Animal studies (mouse models).

What this means for patients: Promising science, but still far from human use.

HIGHLY EXPERIMENTAL AND FUTURE THERAPIES

Synthetic Nanoparticles

How they're given: Intravenous.

How they work: Help VWF bind to blood vessels and platelets.

Current stage: Animal studies only.

What this means for patients: Early research exploring completely new treatment concepts.

siRNA (Gene Silencing Therapy)[6]

How it's given: Subcutaneous injection.

How it works: Turns off problem genes that cause abnormal VWF

Current stage: Preclinical studies in mice with VWD type 2B

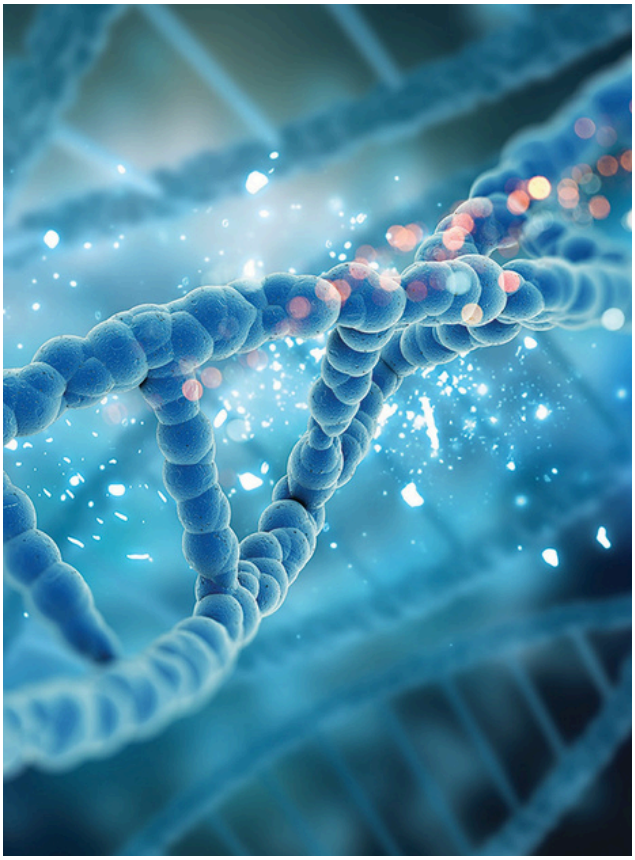

What this means for patients: A potential way to target the genetic cause of disease but not yet tested in people.

Gene Editing (CRISPR/Cas9)

How it works: Directly edits DNA to correct or switch off problem VWF genes.

Current stage: Animal studies (dogs) and laboratory cell studies.

What this means for patients: A possible long-term or permanent treatment in the distant future, but still highly experimental.

WHAT DOES THIS MEAN FOR PEOPLE WITH VWD?

•Most of these treatments are not yet available outside research studies.

•Some may eventually offer less frequent dosing, better bleed control, or new options for difficult- to-treat VWD types.

•Ongoing research is essential, and progress is being made step by step.

If you are interested in new or experimental treatments, talk to your Haemophilia Treatment Centre or haematology specialist. They can explain what is currently available and whether any of the clinical trials may be suitable for you.

Research continues to bring hope for more personalised and effective treatments for people living with von Willebrand disease.

Ashley Fletcher is the AHCDO Australian Bleeding Disorders Registry (ABDR) Senior Research Fellow.

RECOMMENDED READING

To find out more, there is an excellent overview of current and emerging therapies as potential treatment for people with von Willebrand disease, which one of our HTC Directors, Assoc Prof Jennifer Curnow, co-authored with her Westmead Hospital colleagues pathologist Prof Emmanuel Favaloro and haematologist Dr Leonardo Pasalic. If you would like to read the full article and don't have access via a university library, speak to your state library about their interlibrary loan service, where they provide single journal articles for a fee.

Investing in Research. Investing in Hope.

BDASC's 18-Year Commitment to Advancing Bleeding Disorders Research

For the past **18 years**, the Bleeding Disorders Association of South Carolina (BDASC) has proudly supported the National Bleeding Disorders Foundation's (NBDF) **Judith Graham Pool (JGP) Postdoctoral Research Fellowship Program** through an annual donation from the proceeds of our fundraisers like the *Par Fore the Clot Charity Golf Fundraiser*.

As stated in our mission, BDASC is committed to promote ongoing research to improve the quality of life for those affected by bleeding disorders. Supporting this important national research program is one way we put that commitment into action.

Established in 1972, the fellowship honors Dr. Judith Graham Pool, whose groundbreaking discovery in 1965 led to the development of cryoprecipitate, transforming hemophilia treatment & opening the door to advancements that continue today.

For more than five decades, the JGP Fellowship Program has supported promising scientists conducting critical research into hemophilia and other bleeding disorders. Their work has contributed to safer treatments, improved testing and screening, and advancements in gene therapy, bringing our community closer to better treatments and, ultimately, cures.

What makes this program especially meaningful is that it is funded entirely through charitable contributions from chapters, individuals, and foundations, without pharmaceutical industry funding.

Through the generosity of our Par Fore the Clot sponsors, golfers, donors, and volunteers, BDASC is honored to continue investing in the future of research while supporting education, advocacy, and assistance here in South Carolina.

Every donation represents hope. Every discovery brings new possibilities. And every contribution moves us one step closer to a future without bleeding disorders.

Thank you to everyone who helps make our 18-year commitment to research possible. Together, we are making a difference today while investing in a healthier tomorrow!

Strengthening Leadership, Building Connections, and Growing Together!

BDASC Represents South Carolina at the 2026 National Chapter Leadership Seminar

This November, BDASC Executive Director Sue Martin traveled to San Diego, California, to participate in the National Bleeding Disorders Foundation's (NBDF) 2026 Chapter Leadership Seminar, joining chapter leaders from across the country for several days of learning, collaboration, and meaningful connections.

Strong leadership is essential to a strong organization, and opportunities like this allow our leaders to exchange ideas, share successes and challenges, strengthen national partnerships, and bring valuable resources and innovative strategies back to South Carolina.

The seminar focused on important topics including nonprofit leadership, advocacy and public policy, fundraising, organizational sustainability, healthcare access, community engagement, and strengthening relationships between chapters and Hemophilia Treatment Centers. Discussions also explored how chapters can continue evolving to meet the changing needs of individuals and families living with bleeding disorders.

One of the greatest benefits of gathering nationally is the power of connection. No chapter works alone, and by learning from one another, we strengthen our collective voice and discover new opportunities to better serve our communities.

For BDASC, investing in leadership development is an investment in our members and our mission. Staying connected with national partners ensures that South Carolina has a voice in important conversations shaping the future of bleeding disorders care, education, research, and advocacy.

Together, we are stronger. Together, we learn. And together, we continue building a brighter future for the bleeding disorders community of South Carolina!

A New South Carolina

By James Romano, BDASC Legislative Coordinator

South Carolina politics was turned on its ear during the midterm elections. On Tuesday, November 3 rd , the citizens of South Carolina elected a new United States Senator, several new Members of Congress and many new members of the South Carolina House of Representatives. This was part of a greater election day story of the Democratic Party sweeping to majorities in the United States House of Representatives and United States Senate. As of the writing of this article the Democrats has 55 seats in the Senate with one outstanding race still to be called in Alaska. One of those seats that flipped is from South Carolina where Dr. Annie Andrews defeated Darlene Graham, sister of deassed long serving Senator Lindsey Graham (R-SC). Dr. Andrews worked for 14 years at MUSC Children's Hospital in Charleston, SC. I would anticipate Senator Andrews being placed on the Senate Health, Education, Labor and Pensions (HELP) Committee.

Come January, the Democratic Party will control approximately 260 seats in the United States House of Representatives. The Democrats flipped one of those seats in South Carolina with the election of Nancy Lacore in the First District of South Carolina. Nancy Lacore served as a Vice Admiral in the Navy and 93 rd commandant of the Naval District of Washington. I would anticipate Admiral Lacore will be placed on the House Armed Services Committee. State Senator Wes Climber, a Republican, was elected in the Fifth District to succeed Congressman Ralph Norman (R-SC). Senator Climber has resigned his state Senate seat, and James Burns was elected for the remainder of his term. The rest of US House South Carolina delegation was re-elected. Congressman William Timmons (R-6 th) has announced his retirement in 2028.

On Election Day, State Attorney General Alan Wilson was elected to become the 88 th Governor of South Carolina. Governor-elect Wilson is the son of Congressman Joe Wilson (R-2 nd -SC). State Senator Mike Reichenbach was elected as Lieutenant Governor opening up another state senate seat for a special election in early 2027.

Finally, the Democrats broke the Republican super majority in the South Carolina House of Representatives willing election 10 Democrats. There are 17 new members of the 124 Member chamber. The new session will have 78 Republicans to 46 Democrats down from 88 to 36. The sponsors of the copayment accumulator legislation Representative Carla Schuessler and Representative Kevin Hardee were both re-elected. Our legislation will need to be re-introduced in January. The legislature will return to Columbia in late November and early December to organize for January. No leadership changes are anticipated. There could be changes to the committee structure with more Democrats in the House.

The new members of the South Carolina House of Representatives are:

- Clay Counts (R-4 th)
- Jumelle Brooks (D-12 th) (Flipped seat)
- Rick Shealy (R-14 th)
- Malcolm Taylor (D-52 nd)
- Cynthia Ford (D-57) (Flipped seat)
- Michele Demery (D-64 th) (Flipped seat)
- Heather Hart (D-66 th) (Flipped seat)
- Heather Hart (D-66 th) (Flipped seat)
- Tommy Paradise (R-86)
- Joe Madge (D-89 th)
- Byron Walters (D-92 nd) (flipped seat)
- Hunter Hackett (R-96 th)
- Sonja Ogletree Satani (D-98 th) (flipped seat)
- Jarrod Brooks (R-99 th)
- Montez Aiken (D-102 nd) (Flipped seat)
- Nick Uricchio (D-115 th) (Flipped seat)
- Clay Middleton (D-116 th) (Flipped seat)
- Korey Williams (D-122 nd) (Flipped seat)

How Copay Accumulators Harm Patients – Why South Carolina Must Pass Legislation to Ban these Policies

South Carolina Tax Impact Report - H.3934

A Day of Giving. An Impact That Lasts All Year.

Giving Tuesday is a global day of generosity that brings people together to support the causes and communities that matter most. Celebrated on December 1st, this special day is an opportunity to make a difference through giving, volunteering, and spreading awareness.

At the Bleeding Disorders Association of South Carolina (BDASC), your generosity helps us continue making a meaningful difference in the lives of individuals and families affected by bleeding disorders throughout South Carolina.

Your contributions help support vital educational resources, advocacy initiatives, community outreach, and supportive programs that empower individuals and families to navigate life with a bleeding disorder.

There Are Many Ways to Give

You don't have to make a large donation to make a meaningful impact. Here are a few ways you can support BDASC this Giving Tuesday:

- Make a Donation: Every financial contribution helps BDASC continue providing resources, education, and support to our community.
- Spread the Word: Share our mission and Giving Tuesday campaign with friends, family, and your social media network.
- Create a Fundraiser: Start a Facebook fundraiser and invite others to join you in supporting BDASC.
- Give Your Time: Volunteer your time and talents to help strengthen our community.

Together, we are stronger. Together, we make a difference.

Visit our Day of Giving webpage to learn more about how you can support BDASC.

With Gratitude and Heartfelt Appreciation, We Thank Our Community Partners and Donors

We are deeply grateful for the incredible generosity of our supporters and sponsors. Your contributions make it possible for us to continue our mission of serving and uplifting the bleeding disorders community. Because of you, we are able to reach further, dream bigger, and provide life-changing programs, resources, and opportunities for those who need them most.
Thank you for believing in our work and standing beside us—your support is the true driving force behind all that we do.

Make a Difference with Walmart Spark Good!

BDASC is proud to partner with Walmart Spark Good to create even more opportunities for our community to make a difference!

Through Walmart's Spark Good program, shoppers can support organizations like BDASC and help strengthen the communities we serve. This partnership provides another meaningful way for individuals to get involved and contribute to BDASC's mission of supporting individuals with disabilities throughout the Upstate.

Every contribution makes a difference. Community support helps BDASC continue providing valuable programs, resources, and opportunities, including recreational activities, camps, educational seminars, and community events.

When you shop, you can help give back! We encourage our supporters, families, and friends to explore Walmart Spark Good and consider supporting BDASC.

Together, we can make a lasting impact, one act of generosity at a time!

HOW IT WORKS

- Visit Walmart.com/sparkgood or shop through the Walmart app under Giving & Impact
- When searching for a charity, enter Bleeding Disorders Association of South Carolina (BDASC) to appear.
- Select Bleeding Disorders Association of South Carolina (BDASC) as your chosen charity.
- Choose Round Up at checkout.
- Your eligible purchases will be rounded up to the nearest dollar, and the spare change will go directly toward supporting BDASC!

IDELVION®
Coagulation Factor IX (Recombinant), Albumin Fusion Protein

CONFIDENCE IN BLEED PROTECTION COMES FROM KNOWING YOUR FACTOR IX LEVELS

WithIDELVION, Hemophilia B patients of all ages, can have reliable, high and sustained factor IX trough levels.

Knowing your factor levels, means knowing you're protected against future bleeds.

ONLY IDELVION DELIVERS

7 and 14 DAY DOSING* FLEXIBILITY
FDA APPROVED FOR ADOLESCENTS AND ADULTS

+ **20%** STEADY-STATE TROUGH LEVELS
WITH 7-DAY PROPHYLACTIC USE†

+ **0** SPONTANEOUS BLEEDS‡

KNOW YOUR FACTOR LEVEL. PROTECT YOUR FUTURE.

* Oncewell-controlled (1monthwithout spontaneousbleedingorrequiring dose adjustments onaweekly doseof≤40 IU/kg),people12 yearsand older can be transitionedto14-daydosing.
† The average dose for adolescents and adults receiving prophylaxis every 7 dayswas 37IU/kg.
‡ The median AsBR for people who started on 7- or 14-day prophylaxis was 0. For people who switched to prophylaxis from on-demand, the median AsBR was 0.7.
AsBR=annualized spontaneous bleed rate.

IMPORTANT SAFETY INFORMATION

IDELVION®, Coagulation Factor IX (Recombinant), Albumin Fusion Protein (rFIX-FP), is used to control and prevent bleeding episodes in children and adults with hemophilia B. Your doctor might also give you IDELVION before surgical procedures. IDELVION can reduce the number of bleeding episodes when used regularly as prophylaxis.

IDELVION is administered by intravenous injection into the bloodstream and can be self-administered or administered by a caregiver. Do not inject IDELVION without training and approval from your healthcare provider or hemophilia treatment center.

Tell your healthcare provider of any medical condition you might have, including allergies and pregnancy, as well as all medications you are taking. Do not use IDELVION if you know you are allergic to any of its ingredients, including hamster proteins. Tell your doctor if you previously had an allergic reaction to any FIX product.

Stop treatment and immediately contact your healthcare provider if you see signs of an allergic reaction, including a rash or hives, itching, tightness of chest or throat, difficulty breathing, lightheadedness, dizziness, nausea, or a decrease in blood pressure. **Please see continuation of Important Safety Information and brief summary of prescribing information on adjacent page and full prescribing information, including patient product information, at IDELVION.com.**
